Frontend

- React
- TypeScript
- JavaScript (ES6+)
- HTML5
- CSS3 / SCSS
- Tailwind CSS

Web Development

- REST APIs
- Responsive Design
- React Router
- React Hooks
- Component-Based Architecture

Tools

- Git / GitHub
- Vercel

Education

B.A. Archaeology
Manisa Celal Bayar University

Frontend Programming Certificate
ATL Academy (2024–2025)

Languages

English — B2
Azerbaijani — Native
Turkish — C1 (Certified)

Ali Nadirov

Frontend Developer | React • TypeScript • JavaScript

About Me

Frontend Developer specializing in React, TypeScript, and modern JavaScript. Experienced in building responsive web applications, dashboard interfaces, and reusable component-based architectures. Developed personal finance and business dashboard projects with a strong focus on performance, usability, scalability, and clean code practices. Passionate about creating intuitive user experiences and continuously improving frontend development skills through hands-on projects and modern web technologies.

</> Projects

- **1. BudgetBee - Personal Finance Management Platform**
 - Designed and developed a responsive personal finance application that helps users track income, expenses, and budgeting through an intuitive dashboard interface.
 - Built reusable React components and structured scalable frontend architecture for maintainability and future expansion.
 - Developed interactive financial dashboards with category tracking, monthly summaries, and data visualization features.
 - Implemented mock authentication flows and local data persistence using localStorage.
 - Optimized the user experience with responsive layouts for desktop and mobile devices.
 - Focused on clean UI design, usability, and scalable frontend development practices.

Technologies: React, JavaScript, CSS3, React Router, localStorage

- **2. MAISON – Operations Ledger Dashboard**
 - Developed a modern operations dashboard using React, TypeScript, SCSS, and Recharts.
 - Built reusable components and scalable frontend architecture for managing operational data.
 - Implemented interactive charts and data visualization to present key metrics and business insights.
 - Designed responsive dashboard interfaces focused on usability, performance, and clean user experience.

Technologies: React, TypeScript, SCSS, Recharts
